

PRINCIPLES AND PRACTICE OF CLINICAL RESEARCH

Dear Colleagues and Friends,

It is with great pleasure and honour to announce this year's 11th annual Principles and Practice of Clinical Research (PPCR) course. This year's PPCR course will be held at the Ron Joyce Business Centre in Burlington, Ontario on September 21st - 22nd, 2017.

The primary subjects of this year's course are the principles of clinical research, research study design, practical aspects of clinical trials, health economics, health statistics, educational research, and innovation in research. PPCR will provide research and industry personnel, surgeons, residents, fellows and other health professionals with a comprehensive foundation of health research methodology by encompassing basic science methods, evidence based medicine principles, levels of evidence, research ethics, funding opportunities, as well as data management and budgeting.

In addition to the course curriculum, PPCR offers excellent opportunities to meet experts in the field and establish relationships with other colleagues. The program also includes multiple integrated panel discussions and focuses on clinical research. Following every lecture period, all faculty involved will participate in high-level dialogue that will require participation and critical thinking.

We encourage you to register without delay, as space is limited. Our Course Coordinator is available to assist you with all aspects of the registration process. Please feel free to contact the Course Coordinator at abbey.payne@cmecourses.ca for assistance. We have included a course brochure and a registration form for your convenience. Please visit our website at www.cmecourses.ca for additional details.

On behalf of the Course Directors we offer you a very warm invitation to attend this year's 11th annual Principles and Practice of Clinical Research course.

Sincerely,

Mohit Bhandari, MD, PhD, FRCSC
Chair, Division of Orthopaedics
Professor, Department of Surgery
McMaster University
